Re: Utility Patent Application
Invention: 10/090,127

Dear Mr. Till,

Attached is a "new" IDS form for the application above,
along with a correction section II.

Please do not hesitate to call if you have any questions or
concerns.

Sincerely,

Matthew Peirce

II. DESCRIPTION OF THE PRIOR ART

United States Patent No. 5,020,186, issued to Lessig, III, discloses a vacuum cleaner that has a power brush which projects dirt particles directly into a specially formed and located vacuum nozzle in such a manner that low air consumption can be used.

United States Patent No. 4,835,409, issued to Bhagwat et al., discloses a corded/cordless dual-mode power-operated device, such as a household vacuum cleaner, that can be operated from in corded mode or a cordless mode, depending on the power source.
